SUMMARY

Software engineer for 14 years, programming professionally since 2012, with a postgraduate degree in Data Science from PUC-Rio. My current focus is applied AI: LLM assistants inside products, conversational BI, AI tooling for software development (Claude Code, MCP, spec-driven) and MLOps pipelines. I bring a solid engineering foundation: Java and Spring Boot backends, Python, React frontends, system architecture (microservices, hexagonal, messaging) and ERP integrations, across education, logistics, fintech and tax systems. Former Tech Lead, setting standards and architecture for the team. I also ship my own products: SaaS apps with public demos, Next.js templates, Apify scrapers and technical books.

EXPERIENCE

Full Stack Developer (contractor) · Montreal 01/2026 – Present

End-to-end development on a tax management system used by tens of thousands of Brazilians, in Java 21 and Spring Boot on Oracle and Azure, with a React frontend.

- Build backend services for the tax system in Java 21 and Spring Boot, with Oracle on Azure.
- Design and evolve REST APIs and microservices for high-volume transactional workloads, focused on reliability and performance.
- Deliver complete features from backend to React frontend, working with cross-functional teams.

`Java 21 · Spring Boot · Hibernate · Oracle · Azure · React`

Senior Backend Developer · Dexian 06/2025 – 12/2025

Backend for mission-critical payment processing systems at a banking-sector client, focused on performance, security and high availability.

- Built and maintained payment-flow microservices in Java 17/21 and Spring Boot, with REST APIs and Oracle.
- Applied hexagonal architecture and asynchronous RabbitMQ messaging between services.
- Wrote unit and integration tests with JUnit and Mockito and monitored logs to find and fix production failures.
- Worked on Jenkins CI/CD pipelines in Scrum teams.

`Java 21 · Spring Boot · RabbitMQ · Oracle · JUnit / Mockito · Jenkins`

Tech Lead · Esig Software 11/2024 – 08/2025

Technical leadership of a multidisciplinary team on Java educational software, responsible for architecture, code quality and team standards.

- Led the multidisciplinary team technically across the educational software projects.
- Drove architecture and development of scalable Java systems, ensuring code quality and best practices.
- Defined coding standards, technical guidelines and development strategies.
- Coordinated integration with infrastructure and information security across multiple environments.

`Java · Struts · Hibernate / JPA · PostgreSQL · Jenkins · iReports`

Senior Software Engineer · Promob Software Solutions 10/2021 – 08/2024

Modernization of the company ERP, focused on performance, scalability and reliability, plus backend automation of business processes.

- Led ERP modernization initiatives focused on performance, scalability and reliability.
- Built backend features and automated business processes.
- Kept third-party integrations working and production environments highly available.

`Java 11+ · Spring Boot · RabbitMQ · Docker · Kubernetes · PostgreSQL`

Software Engineer · Transportes Bertolini 05/2021 – 10/2021

Support and evolution of a transport company's ERP.

- Diagnosed operational issues, updated the ERP and implemented process improvements for transport operations.

`Java 8 · Spring · JSP · iBatis · PostgreSQL`

Software Engineer — ERP & Integrations · Group 02/2019 – 05/2021

Integrations between internal and external systems and evolution of a legacy ERP, with Java backend services for orders and automation.

- Integrated REST and SOAP APIs across internal and external systems, including payment gateways and messaging platforms.
- Maintained and evolved a legacy ERP in Visual DataFlex, adding features and improving stability.
- Contributed Java backend services for order management and business process automation.

`Java 11+ · Spring Boot · REST / SOAP · RabbitMQ · Oracle · Visual DataFlex`

Software Developer · Promob Software Solutions 11/2013 – 02/2019

Six years on the company ERP: order workflows, integrations with external platforms and evolution of critical features.

- Managed order workflows and built Java integrations between ERP modules and external platforms.
- Evolved critical ERP features with a focus on stability, performance and maintainability.
- Took part in REST and SOAP integration projects, improving connectivity and data consistency between systems.

`Java · Spring Boot · JSF / Primefaces · PostgreSQL · JUnit · Jenkins`

Junior Software Developer · MTW 09/2012 – 11/2013

First role as a programmer, on the EducaWeb education system and on data integration between schools and government.

- Coordinated the data integration project between schools and government, streamlining communication between systems.
- Was a key contributor to the company's adoption of Scrum.

`Java 7 · Spring · JSP · iBatis · PostgreSQL · Scrum`

OWN PROJECTS AND PRODUCTS

- **Lastro** — Multi-tenant real estate CRM (FastAPI, Postgres RLS, React PWA) with an AI assistant.
- **InvestLink** — Stock and REIT screener with an explainable score built on CVM filings (Flask, React, Postgres).
- **Vizion** — AI-assisted BI: plain-language questions become charts and reports (Next.js, FastAPI, DuckDB).
- **Kairo templates** — 9 Next.js templates for sale, including 3 complete SaaS apps with Stripe and live demos.
- **Apify actors** — 44 public scrapers on the Apify Store (Python), billed per result.
- **Books** — Technical books on AI and interviews on Amazon, plus free books on AI, MCP and careers.

EDUCATION

Postgraduate in Data Science & Analytics · PUC-Rio — Rio de Janeiro · Concluded 2024 – 2025

Bachelor's in Systems Analysis & Development · Ftec — Caxias do Sul · Academic honor — outstanding student 2009 – 2012

IBM Data Science Professional Certificate · Coursera — IBM 2023

SKILLS

Applied AI	LLMs in products, Claude API, Gemini, Claude Code, MCP, Spec-driven development
MLOps & data	MLOps, Machine Learning, Data engineering, ETL, iReports
Languages	Java, Python, JavaScript, TypeScript, SQL
Frameworks & libraries	Spring Boot, Hibernate / JPA, Struts, JSP, Flask, FastAPI, React, Next.js, Material-UI
Data & infrastructure	PostgreSQL, Oracle, IBM DB2, Docker, RabbitMQ, Kafka, Maven, Gradle, GitLab, Jenkins, CI/CD
Architecture & integration	System architecture, Microservices, REST APIs, SOAP, ERP integration, Monorepo
Leadership & process	Tech Lead, Scrum / Agile, Code review, Mentoring, Best practices
